

Where Is *Your* Home?

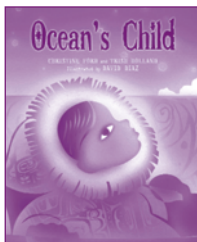

Ocean's Child is about sleepy animals that live in an area of North America known as the Pacific Northwest. What area of North America do you live in?

There are 10 different types of animals in *Ocean's Child*. They are:

Albatross	Beluga Whales	Dolphins	Orca Whales	Otters
Polar Bears	Puffins	Sea Lions	Seals	Walruses

How many different animals from your area can you list?

Time to Sleep!

When it's time to go to sleep, the baby animals from *Ocean's Child* find their mothers and snuggle up for the night. The baby polar bear is ready for bed, but he is lost! Using a crayon or pencil, help the mother and child from the book navigate through the maze to find the baby polar bear.

Count the Puffins!

Puffins are seabirds that live in the Pacific Northwest. For beds, they make nests in rock crevices or burrow into the soil.

Where do you sleep at night? _____

The puffins in *Ocean's Child* are snuggled up warm in their nests, getting ready for a full night of sleep.

How many puffins can you count in the picture above? _____
