

encapsulated bead & knitted tube necklace

This design uses an easy technique to create long tubes of knitting into which beads can be inserted. The stitches are worked on large needles in shimmering metallic yarn to enclose even more shimmering beads of various sizes, stretching the tube to give an open lattice effect.

materials

for the bronze necklace:

1 ⁷/80z/25g ball metallic yarn, such as Rowan Lurex Shimmer or Yeoman Luxury Collection Starlight in bronze 22 gold ball beads— 5 large (30mm), 10 medium (25mm), and 7 small (20mm) pair size 8 (5mm) doublepointed knitting needles blunt-ended yarn needle

for the gold necklace:

1 ⁷/₈oz/25g ball metallic yarn, such as Rowan Lurex Shimmer or Yeoman Luxury Collection Starlight in gold 19 silver ball beads— 9 medium (25mm) and 10 small (20mm) pair size 8 (5mm) doublepointed knitting needles blunt-ended yarn needle

note • if you can't find metallic beads, use natural wooden ball beads spray painted gold or silver • the knots used in these necklaces are made with short lengths of metallic yarn, tied twice, very tightly, and on either side of each bead

make knitted tube: cast on 6 stitches. knit 1 row. * slide the stitches along left-hand needle, without turning needles, up to the tip of the needle. bring yarn across back of work from left to right and pull tightly. knit next row. repeat from * until work measures 30in/75cm for bronze necklace and 32in/80cm for gold necklace. leave stitches on safety pin with long end of yarn for grafting to cast-on edge.

for the bronze necklace: tie a knot 1/4 in/1 cm from cast-on edge of knitted tube. insert a bead into knitted tube and push to the knotted end. tie a knot tightly on other side of bead. repeat with all other beads until one bead remains. insert last bead into tube. join tube by grafting together cast-on stitches and stitches on safety pin (see page 29). tie a knot across the grafting.

for the gold necklace: tie a knot %in/2cm from cast-on edge. insert a bead. tie tightly to enclose. tie another knot %in/2cm farther along tube. insert a second bead. tie tightly as before. continue adding beads, mixing sizes, leaving ³/₄in/2cm between each bead until tube is full. tie last bead. join tube by grafting cast-on stitches with stitches on safety pin (see page 29). tie a knot across the grafting.
