# WORKBOOKS

Through grade 2, children are learning to read; from grade 3 on, children are reading to learn. At any time in these years, a gap in the reading foundation can make learning of any type—enrichment or remedial—difficult, if not impossible.

Sylvan workbooks use a systematic, age- and grade-appropriate approach that helps children find, restore, or strengthen their reading and language-arts skills.

All of the components of Sylvan's reading program lead to the ultimate goals of understanding what an author has written and fostering reading independence and confidence. Heavily illustrated and 4-color, these workbooks include exercises and activities that are both fun and educational. Individual subject workbooks enable students to concentrate on reading comprehension, spelling, and vocabulary, or they can choose a "super" workbook that combines all three subjects.
